

CYRUS
FINANCE

A NEW PROTOCOL. FOR OPTIMIZING YIELD IN DEFI

Transparent

Without
intermediaries

On-chain

cyrus.finance

cyrus.finance

WHAT IS CYRUS FINANCE

**A decentralized protocol
for managing yield
strategies.**

All processes are performed by smart contracts, without intermediaries.

Combines proprietary strategies and proven third-party DeFi solutions.

Fully transparent architecture and open source.

THE PROBLEM WE ARE SOLVING

DeFi is complex and requires experience.

Manual position management is labor-intensive.

Users are forced to switch between multiple protocols.

High entry threshold and often lack of transparency.

OUR SOLUTION

Cyrus Finance creates a single protocol that:

Automates staking and strategy management.

Simplifies access to complex DeFi mechanics.

Ensures the openness of all operations: everything is on-chain.

It makes it easy to manage assets through a simple interface.

KEY ADVANTAGES

On-chain logic: no hidden processes or intermediaries.

Transparency and openness – smart contracts are available for verification.

Flexibility of strategies: quick selection, switching, risk management.

Automation – profits and processes without manual actions.

Versatility – suitable for both beginners and experts.

HOW IT WORKS

Connecting a Web3 wallet.

01.

Choosing a strategy for goals and risk profile.

02.

The funds are sent to the protocol's smart contracts.

03.

Automatic staking and strategy operation.

04.

The ability to reinvest, add funds, withdraw, and manage a position.

05.

STRATEGIES

Cyrus author's
strategies.

Strategies for third-
party DeFi protocols.

A balance between
profitability, risk and
accessibility.

Optimized
distribution and
reinvestment
mechanics.

cyrus.finance

SAFETY

Architecture based on
smart contracts.

The ability to verify any
action on the blockchain.

There are no
intermediaries, no
custodial control.

Principles of open and
verifiable code.

CERTIK

Your funds are fully protected.

All of our smart contracts have been audited by
CertiK, a trusted global leader in blockchain security.

WHAT IS AVAILABLE AT LAUNCH

A basic set of strategies

for staking and income optimization
in pancakeswap.

Full automation of interactions.

**Transparent commissions
and on-chain operations.**

**User-friendly interface +
connection of wallets.**

THE VISION

Creating a scalable DeFi ecosystem.

Expanding the set of strategies and integrations.

Building a culture of transparency and trust around DeFi.

Make profitable strategies available to every Web3 user.

PARTNER PROGRAM

How to unlock levels:

To unlock each level, two conditions must be met.:

Active Deposit: Maintain an active deposit for the required minimum amount.

01.

Team Turnover: Achieve the required team turnover, which is calculated as the sum of all deposits made by your partners.

02.

Invite your friends and earn money together! Every time your friend collects or reinvests his rewards, you receive a percentage of his income.

Our affiliate program has 20 levels, which makes it possible to earn money on several levels of your network.

[Watch the Gitbook](#)

You will receive rewards solely from the income generated by your partners.
